

## This is how it looks like to not worry about your electricity bills

**For self consumption,** your solar system will lower your energy bills and offers an immediate payback from subsidies.

**For net metering,** you can maximize your system's return on investment while still limiting your upfront system costs.

## Why choose Trina Solar?

- ☀️ 32 Gigawatt Power supplied to the world (1GW = power 700000 homes)
- ☀️ 21 years of history
- ☀️ Recognition from World Economic Forum, Bloomberg, Deloitte etc
- ☀️ Ranked as 1 of the most bankable solar modules with strong financial background
- ☀️ 790 Solar Patents filed to date
- ☀️ Hybrid System available (Please talk to our sales person)
